

A Wonderful Job Description:

PHP Developer

Agency Overview:

Wonderful is an award winning agency that is built on trusted reputation and superior digital and creative services for start up's, SME's, large corporate organisations and government clients. We have worked with big brands such as Diageo, KLM, Dreamland, Slush Puppie & Pizza Express to name a few!

Wonderful is renowned for providing game changing creative solutions that deliver results and business growth.

Our company culture and ethos are important in who we are and what we deliver. We are looking for people who are:

Creative (we want people who think out of the box and bring creative solutions into all aspects of day to day operation)

Collaborative (we want people who want to work together as part of a team, listening, inputting, challenging and delivering value)

Courageous (we want people who are able to challenge the 'norm' and create ideas that impress our clients and the marketing industry)

Are you a Wonderful person?

Job Description:

We're looking for a PHP developer based in Maidstone, with three or more years commercial experience.

We're strong believers in open source - our core platforms are wordpress & woocommerce, joomla, with some use of drupal, magento & laravel. We also deliver software and website solutions for a wide range of clients.

If you can inspire a delivery team, have a passion for technical excellence and have the communication and collaboration skills to work effectively with our clients, then this could be a great role for you.

Your responsibilities

- Developing innovative, high quality technical solutions
- Building relationships with clients and helping them to achieve their goals
- Research new technologies and ways of delivering projects
- Presenting and rationalising your work internally and to our clients.

- Work both independently and as part of a wider team to deliver on client software and web solutions
- Maintaining the high quality technical standards for all the agency's output.

Who we're looking for - the "must-haves"

- At least three years demonstrable on-the-job experience in developing website and ecommerce solutions
- Great written and face to face communication skills
- An ability to translate complex client requirements into a deliverable plan
- A dedication to coding excellence and continuous personal development
- An ability to execute projects across multiple domains
- Core experience in Open Source CMS development
- At least 2 years agency experience

Who we're looking for - the "nice-to-haves"

You'll have ...

- Worked with a good range of third party APIs
- Experience of software delivery using an Agile methodology
- Experience of working with Linux servers
- Experience working with JavaScript frameworks such as React or Angular and ES6 Javascript
- Familiarity using test frameworks

Salary and benefits

The starting salary for this role will be between £28,000 and £32,000 dependent upon experience.

We are looking for people who want to contribute to team development and overall business goals and to grow in their remuneration accordingly.

To apply

To apply for this role please send in your CV, covering letter and any supporting material you may wish to recruitment@bewonderful.co.uk
