

A Wonderful Job Description: Full Stack Developer

Agency Overview:

Wonderful is an award winning agency that is built on trusted reputation and superior digital and creative services for start up's, SME's, large corporate organisations and government clients. We have worked with big brands such as Diageo, KLM, Dreamland, Slush Puppie & Pizza Express to name a few!

Wonderful is renowned for providing game changing creative solutions that deliver results and business growth.

Our company culture and ethos are important in who we are and what we deliver. Built on a continual desire to grow and improve, we create the environment that empowers and challenges our people to do great work.

We are therefore looking for people who are:

Creative (think out of the box and bring creative solutions into all aspects of day to day operation)

Collaborative (who not only thrive working individually, but as part of a team - listening, inputting, challenging and delivering value)

Courageous (the ability to challenge the 'norm', to drive positive, innovative change. Unafraid to fully embrace new challenges, and an outlook seeing challenges as opportunities to grow. This is how we offer the most cutting edge ideas and solutions that impress our clients and the marketing industry.)

Are you a Wonderful person?

Job Description:

We're looking for a full stack developer for a role based in Maidstone, with 3+ years of commercial experience.

We are great supporters of open source code and love to contribute where possible.

Our core development platforms are PHP, HTML5, CSS (SASS/LESS), Javascript, and NodeJS.

We deliver web-based software solutions from simple brochure websites to full-blown web applications for a wide range of clients.

If you have a passion for technology and web development along with great communication and collaboration skills, then this could be a great role for you.

Duties may vary from time to time without changing the nature of the post or the level of responsibility. The post holder may also be required to carry out any other duties as required by their line manager.

Your responsibilities:

- Developing innovative, high-quality technical solutions
- Building relationships with clients and helping them to achieve their goals
- Research new technologies and ways of delivering projects
- Presenting and rationalising your work internally and to our clients.
- Work both independently and as part of a wider team to deliver on client software and web solutions
- Develop high-quality technical standards for all the agency's output.
- Ability to work under pressure and deliver projects within deadlines

Required skills:

- At least three years demonstrable on-the-job experience in software development and web solutions
- Great written and face to face communication skills
- Ability to translate complex client requirements into a deliverable plan
- A dedication to coding excellence and continuous personal development
- An ability to execute projects across multiple domains
- Solid experience with Content Management Systems, SASS (or LESS), Javascript and nodeJS
- Worked with 3rd party APIs (REST, SOAP, etc)
- Solid knowledge of Git version control

Desired additional skills:

- Experience in software delivery using an Agile methodology
- Experience in working with Linux servers (CLI)
- Experience with Drupal
- ES6/7 Javascript Knowledge
- Experience working with JavaScript frameworks such as Vue.JS, ReactJS, React-Native or Angular

We are looking for people who want to contribute to team development and overall business goals and to grow in their remuneration accordingly. To apply for this role please send in your CV, covering letter and any supporting material (such as GitHub repositories and/or portfolio) you may wish to recruitment@bewonderful.co.uk
